## **DETAILED ACTION**

## Allowable Subject Matter

- 1. Claims 24-47 respectively renumbered as 1-24 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Morito discloses a method for authenticating a disk containing digital video signals recorded onto a fresh disk by a disk recorder, said disk recorder comprising a disk feeder, a recording tray, a recording compartment, a code generator, a code printer and a code mixer (Figure 2), the method comprising the steps of: changing said fresh disk with said printer and imprinting a code onto a label side of said fresh disk, said label side being the surface opposite a surface used for the recording of said video signal (Column 4 Lines 28-40 describes the imprinting of information onto the disks); mixing said code signal with said digital video signal by said code mixer and recording a mixed signal onto said disk imprinted with said exclusive code (Figure 8 shows a controller for generating exclusive code as described in Column 4 Lines 38-45. Additionally, Figure 7 shows the disk identifier Sd mixed on the disk with coded signal Sp). Miller et al teaches a system that has a disk drive capable of handling multiple disks for processing as seen in Figure 1 and further described in Column 2 Lines 44+. However, the prior art of record fails to disclose, suggest or teach the following limitation,

Application/Control Number: 09/688,901

Art Unit: 2621

"generating an exclusive code and a corresponding code signal for said fresh
disk by said code generator, said code including data identifying the data
source of the digital video signal recorded on the disk."

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Contact Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamie Vent whose telephone number is 571-272-7384. The examiner can normally be reached on 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller can be reached on 571-272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
